SPIRAL BEADED & FEATHERED PEN

Design by Alexandra Torra
Make one to match your diary or journal!

Materials:

- Variety of DFN Embroidery floss colors
- A Pen (stick pens work best)
- Tacky Glue
- Feathers
- Tape
- Glass beads in complementary colors
- Beading wire

Instructions:

1. Using tape, attach a bunch of feathers to the top of the pen. Make sure the ends of the feathers are neatly and smoothly covered with tape.
2. Starting at the bottom of the pen, dab a bit of glue on the end of your first floss color. Hold firmly to the pen until it adheres, and begin wrapping until you have covered an inch or so.
3. To change colors, fold the new color over the floss you are using, hold down and wrap for two or three rounds. At this point, use the new color to wrap over the end of the first color.
4. After about 3 inches, tape one end of your beading wire to the pen and secure by wrapping with the floss.
5. Hold the wire out of your way while you continue changing colors and wrapping the pen. When you are about ½ inch from the top, stop wrapping the floss and string your beads on the wire. Wrap the beaded wire loosely around the pen, spiraling upwards.
6. Tape the end of the wire to the top ½ inch of the pen and secure by wrapping over the wire with your final floss color.
7. To finish simply add a dab of glue to the end of the floss and firmly hold in place until it sets. Let dry completely.

WRAPPED FLIP-FLOPS

Design by Alexandra Torra
Dazzle all of your friends poolside when you show up wearing these fun, creative flip-flops!

Materials:

- DFN Craft Thread colors
- Flip flops
- Super tacky non-water based glue.
- 2 cabochons or decorative buttons.

Instructions:

1. First get an idea of how you'd like your colors arranged.
2. Starting at the outside edge of one flip-flop, glue the first craft thread color to the inside and simply wrap it over the strap. Continue this method, changing colors as you choose.
3. When you reach the "toe separator" reverse your pattern so that it repeats itself on the other side.
4. Repeat this on the second flip flop. Make sure ends are firmly and neatly glued down.
5. Now glue your cabochon or button on the toe area to cover the gap in wrapping. Let dry completely. Make a new pair to match every outfit!

Work carefully and slowly, keeping the thread taut. Be careful with your glue. If you'd care to, cover all but the flip flop straps with tissue paper to keep them clean and glue free.

Just-a-Chart

Counted Cross Stitch

All sizes represent the finished design area if stitched on 14-count Aida, unless otherwise noted.

TIPS & TRICKS:

A chart is a diagrammatic description of how to complete your design. Codes (such as #, +, <, ? etc.) are used to represent the different colored threads used to create the end result. Each square on the chart represents a square on the fabric. Charts are often sold on their own without cross stitch materials – this allows you to use thread and fabric that you may already have or to purchase these individually. Each chart has a clear list of the stranded cotton required to complete the design.

It is important to read through all the instructions before beginning with your design. It is a good idea to sew over the edges of the fabric by hand or with a zigzag stitch on a sewing machine to prevent fraying although this is not absolutely necessary. Pinking scissors can be used to create a non-fraying zigzag edge.

Iron your fabric if there are creases. Find the center of the fabric by folding it in half vertically and again horizontally. It is a good idea to start from the center of the design if this is convenient, although this is not essential.

Stitches

Cross stitch

Directions: A whole cross stitch is worked by stitching a line of half crosses first and then going back along the same line adding the top stitches. Bring your needle through at the bottom left corner of the square and insert diagonally at the top right. Another method is to complete each stitch as you go; this is good for working vertical rows of cross stitches. It is very important to always work the lower left to upper right stitch first so that all the top threads have the same direction slant. This ensures an even consistency in your finished design.

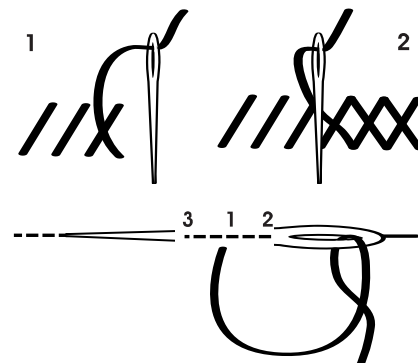

Quarter cross stitch

Directions: Quarter stitches take up a quarter of the area of a whole cross stitch. You will have to split the center threads on your Aida fabric with your needle.

Back stitch

Backstitching is a running stitch used to outline an area of the design to add definition or to create lettering. It should be worked after the design has been completed. 1 strand of thread is usually used for backstitching.

Directions: Bring needle through at (1), insert at (2). Bring needle through at (3) in front for the next stitch. The following stitch will begin at (1) and end in front of (3).

TIPS & TRICKS:

Aida fabric

The threads in Aida fabric are woven in a precise square-pattern which makes it easy to guide the needle in and out of the fabric, to obtain even stitches and to count squares. You usually stitch over 1 square. 11-count Aida means that there are 11 squares in each inch of fabric and 18-count Aida means that there are 18 squares in each inch. The count of the fabric will therefore determine the finished size of the design. The higher the count, the smaller the cross stitches and it is easier to cross stitch in lower count fabric, that is, 11-count is easier than 18-count.

Evenweave fabric

Evenweave is any cotton, blended cotton/synthetic, linen or synthetic fabric woven so there is a hole for stitching between each single thread. On Aida, we tend to stitch over 1, however, on Evenweave, we usually stitch over 2 threads. Evenweave comes in a variety of threads counts, most common are 24, 28 and 32.

Stranded Cotton

Sometimes called floss, this thread is comprised of 6 easily separable strands so that you can vary your stitching results depending on the number of strands used. It is ideal for cross stitches, long stitches, short stitches and satin stitches. Most cross stitching is done with 2 strands and the pattern always clearly states whether any stitches are to be completed with 1 or more than 2 strands.

Threads are colorfast; however, washing should only be undertaken if absolutely necessary. If you need to wash your work, do so gently using lukewarm water and a non-biological detergent. Rinse well and place face downwards on a thick lightly colored towel and press with a warm iron.

Embroidery hoop or frame

Frames can be helpful to hold your fabric while you stitch. Some people prefer to stitch holding their fabric in their hands and if their tension is good, this technique will work well. Others may find that the "holes" are opening up or the fabric is puckering, this is when a frame of hoop should be used - if this technique is used you will be pulling your needle straight up from the back and pushing it straight down toward the back which will require that you move one hand from the front to the back to pull the needle through and vice versa. If you have a stand, you can stitch with one hand on top of the fabric and one underneath so that you don't have to move one hand from front to back over and over.

Multi-Color Stamped Cross Stitch Pillowcases

Each package contains two stamped polyester/cotton blend, machine washable pillowcases screen-printed with permanent ink, graph and instructions.

Colorful pillowcases are ready-to-use and can be stitched for a personal touch. Floss requirements listed on package. Imported pillowcases. Approximately 20" x 30"

What is acid FREE?

If the terms "archival", "acid-free", and "lignin free" confuse you, you are not alone. To help you better understand how to protect your scrapbook treasures look no further.

- Q: What exactly does "acid-free" mean?
 A: If a material has a pH value of 7 to 8.5, it is considered acid-free.
- Q: How can acid harm my photos and mementos?
 A: If an acidic product comes in contact with photos, paper or other mementos, the acid can migrate, causing deterioration and discoloration over time.
- Q: What is pH?
 A: The pH of a product is a measure of its acidity or alkalinity. On a scale of 0 to 14, 7 is considered neutral. Below 7 indicates acidity.

A lower number indicates an INCREASE in the level of acid. Above 7 indicates alkalinity, with the level of alkaline increasing as the number increases.

- Q: What is lignin and why is it harmful?
 A: Lignin is a natural bonding substance that is found in wood fibers of untreated papers. Over time, lignin breaks down into acids and peroxides that can cause deterioration of the paper, adversely affecting photos and mementos that come in contact with it. Buffering is the process of adding alkaline agents during the papermaking process to counteract the effect of acidic contamination of the paper.

Scrapbooking Hints & Techniques

- **Fibers are Yarns:** To glue fibers in free-form design (curves, curly-ques, etc), use an acid-free, fine-tip glue pen. Draw onto paper where you want the fibers to go. Allow glue to become tacky, then press fiber onto glue.
- **To apply fibers in straight lines:** Begin on back side of page, run across the surface and then wrap to the back. Adhere ends with acid-free tape.
- **To hold fibers sporadically in place:** Use tiny glue dots. These can be pulled and rolled to form small line. Glue dots can also be cut for smaller areas. To quickly iron non-fuzzy ribbons and threads, use a curling iron. Place trim against rod...and quickly pull trim across rod.
- **To score paper for perfect fold:** Using a straight edge and a stylus (or dead ball-point pen), draw line on back side of paper. The more pressure, the sharper the crease.
- **Wax paper:** Makes a super lubricant for punches. Just punch a few sheets and see the difference.
- **Stickers:** Peel diagonally, beginning with the largest part of the design first. Keep sticker flat...and fold paper the release paper.
- **To Emboss vellum:** Draw pattern on wrong-side of vellum
- **Sticky scissors:** Try alcohol wipes found in drug stores for a quick, portable solution.
- **Cutting with a craft blade (Xacto blade):** Pull knife towards yourself, shift paper often so that you are always pulling the knife towards yourself.
- **Cutting Tip:** When cutting around intricate shapes, turn the paper, not the scissor.
- **Tearing handmade papers:** To achieve a fairly straight edge on mulberry and other hand-made papers: Place a ruler 1/4" away from your tear line. Using a small artist paint brush, paint water onto the line. Allow paper to sit for a minute...then tear.

Glue Recommendations

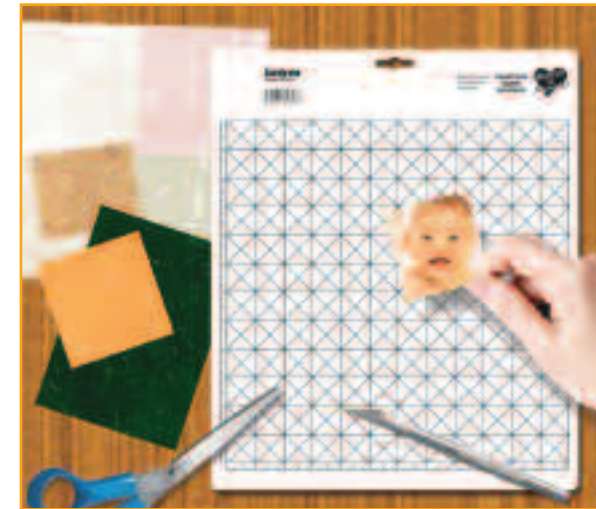

- **For large flat surfaces:** Use acid-free glue sticks or transfer dot sheets.
- **For small embellishments and threads:** Tiny Glue dots or fine glue pens.
- **For small die cuts:** Use acid-free small transfer dot sheets.
- **For buttons or raised objects:** Glue dots (these can be trimmed or stretched to fit the item).

Scrapbooking Work Surface

Protect your tables and have handy measurements at your finger tips. Our plastic, work surface is cut resistant and pre-printed with inches and a handy grid to make trimming your scrapbooking papers and embellishments a snap.

Surface size is 13" x 15".

168-0200 Scrapbooking Work Surface

Practice Pages

Plan your page in layers before you commit. Arrange, re-arrange, re-arrange some more. Special non-stick plastic means nothing is permanent until you want it to be. Our acetate practice pages are coated with a special non-stick surface that allows you to apply and re-apply stickers, glued die-cuts and other design elements until you are happy with their placement.

Each package contains: (3) 12" x 12" re-useable plastic sheets

168-0201 Scrapbooking Practice Pages

Step 1: Mount Photo to First Layer
Step 2: Add Sticker Layer
Step 3: Add Embellishment Layer

90436 Halloween
Designed by Patrick Lose Studios

Made from a non-yellowing clear silicone, Designer Clear™ stamps are easy to use. Simply peel the stamp from the protective backer and stick to a Designer Clear™ acrylic block. The stamp and block are both clear so you get perfect placement and positioning every time. And when you're done, the protective backer is marked with an outline of the stamped image to help you keep your stamps organized.

ALL NEW!

Designer Clear™ Acrylic Blocks

For use with our Designer Clear™ Stamps sets. Peel and stick clear stamps to create your own rubber stamp. Reusable, just add the clear stamps you need—again and again. Clear acrylic allows for perfect placement and stamp alignment every time. Rounded edges make the block fit comfortably in your hand.

Large size is perfect for mixing and matching multiple stamps to create your own unique images.

Small size is perfect for tags, small cards, bookmarks and other small projects.

Janlynn's Promotional "Best Value" Tote 10 oz. 100% Natural Cotton Canvas

Recyclable Bags

They are fashionable, durable, natural cotton. Did you know the average consumer has to throw away almost 1000 plastic and paper bags every year? Put your logo on one and it's a powerful walking testimonial to your environmental sensitivity and your concern for the community's well being.

Minimum order 300. One color, one side. One time screen charge of \$25 applies. One time set-up charge of \$20 (waived for orders over 500 quantity) Lead time 3-4 weeks.
